Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuno et al (US Patent No. 5,937,664) in view of "Engineering Design Choice". Matsuno discloses a battery cooling system for a vehicle comprising: a cooling duct (60) having another end open towards the interior of a vehicle compartment (14) is connected to and open end in the battery electrical chamber (18) and a cooling fan (62) is provided in said cooling duct. Furthermore, as stated in column 9, lines (40-50), the circulation duct as an open end within a trunk space (58) and communicates with the interior of the vehicle compartment (14) via truck space room (58). Matusuno lacks a discharge duct or port with fan disposed outwardly of an interior material on the trunk. In absence of critical or expected results it is deemed a mere matter of "Engineering Design Choice" with respect to situating a duct and fan outwardly of an interior material. It would have been obvious to one ordinary skill in the art at the time the invention was made to modify the disclosed invention of Matusuno with an outwardly facing duct and fan for improving the re-circulation of air back into interior compartment.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
